NOTICE OF DISCLAIMER

ALL MATERIALS AND SERVICES ARE PROVIDED ON AN "AS IS" AND "AS AVAILABLE" BASIS WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR THE WARRANTY OF NON-INFRINGEMENT. Due to the limitations, constraints, inaccuracies and incompleteness of any information and mapping data available to MapPro Environmental Data, certain conventions have been utilized in preparing the locations of all sites residing in MapPro Environmental Data's databases. No attempt is made to represent the precise location, size, shape or dimensions of the associated property.

WAIVER OF LIABILITY

Although MapPro Environmental Data, Inc. uses reasonable efforts to display the actual location of each site, MapPro Environmental Data does not and cannot warrant the accuracy of these sites with regard to exact location, size, shape or dimensions. All authorized users of MapPro Environmental Data's services are signifying an understanding of MapPro Environmental Data's searching and mapping conventions and agree to waive any and all liability claims associated with any report, database search, and map results showing incomplete and/or inaccurate site locations. YOUR EXCLUSIVE REMEDY AND MAPPRO ENVIRONMENTAL DATA'S ENTIRE LIABILITY, IF ANY, FOR ANY CLAIMS, OTHER THAN THOSE WAIVED ABOVE ARISING OUT OF THESE TERMS OF USE AND YOUR USE OF THIS INFORMATION SHALL BE LIMITED TO THE AMOUNT PAID FOR THE DATABASE REPORT GIVING RISE TO THE LIABILITY. IN NO EVENT SHALL MAPPRO ENVIRONMENTAL DATA INC. OR ITS AFFILIATES BE LIABLE TO YOU OR ANY THIRD PARTY FOR ANY SPECIAL, PUNITIVE, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES OF ANY KIND, OR ANY DAMAGES WHATSOEVER, INCLUDING, WITHOUT LIMITATION, THOSE RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER OR NOT MAPPRO ENVIRONMENTAL DATA INC. HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, AND ON ANY THEORY OF LIABILITY, ARISING OUT OF OR IN CONNECTION WITH THE USE OF THIS DATA.

Site Rating: ■ Lower Risk

CAUTION: The location of findings shown on this map are approximate only. Other findings may exist that are not shown on this map. This map is no substitute for an evaluation or site assessment by a qualified Environmental Professional.

Environmental Hazards: ■ Tier 1 ■ Tier 2 ■ Tier 3

Rapid Alert Plus Report Findings

New York Plus, 303 E 47th St, New York, New York 10017

Thank you for contacting MapPro Environmental Data, Inc. for a RapidAlert Plus Report for the site described above. MapPro Environmental Data has searched its records and databases for sites that may be within approximately 1/8 (.125) mile of the subject property. This report cannot and does not conclude that there are not other sites within the searched perimeter, whether from the listed searched data sources or other data sources unlisted or not searched, nor does this report conclude that the sites included are correctly located and displayed on any map included. The analyses, ratings, classifications, estimates, alerts, and risk valuations that may be included in this report are not intended to provide, nor should they be interpreted as providing, a conclusion or assessment of any actual or potential environmental risk for any property. This report is for illustrative purposes only and is not a substitute for an evaluation by a qualified Environmental Professional. This report is not a substitute for a site assessment performed by a qualified Environmental Professional, nor is this report, maps, or data included a substitute for information required for a Phase I Environmental Site Assessment performed by a qualified Environmental Professional. This report is not to be construed as legal advice. The purchaser accepts this report "as is".

0 Tier 1 sites found

0 Tier 2 sites found

143 Tier 3 sites found

Tier 1 sites are facilities with cleanup activities tracked by a state or federal agency such as an EPA Superfund Site.

Tier 2 sites are facilities with reported incidents or areas of special concern such as a Leaking Underground Storage Tank or a Landfill.

Tier 3 sites are generally permit applications, such as an underground storage tank.

Databases Identified

Databases	Description
RCRA-GEN - RCRA Generators List	ASTM E1527-13 3.2.74 defines the RCRA generators list as a list kept by EPA of those persons or entities that generate hazardous wastes as defined and regulated by RCRA. The Environmental Protection Agency regulates Hazardous Waste Generators. They are classified by the quantity of waste generated: Small Quantity Generator (SQG), Large Quantity Generator (LQG), and Conditionally Exempt SQG (CESQG).
ERNS - Emergency Response Notification System	ASTM E1527-13 3.2.34 defines the ERNS list as EPA's emergency response notification system list of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such releases or spills are codified in 40 CFR Parts 302 and 355.

Databases Identified	
Databases	Description
FRS - Facility Registration System	A centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS incorporates information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel. FRS provides a single integrated source of comprehensive (air, water and waste) environmental information about facilities, sites or places. EPA's Office of Information Collection in the Office of Environmental Information is the organization responsible for implementation and management of FRS.
RCRA-NON - RCRA Non Generators	These Sites are listed in the RCRA System as Non Generators.
NY PBS - NY Petroleum Bulk Storage (PBS) Database	The PBS program applies to facilities that store more than 1,100 gallons of petroleum in aboveground and underground storage tanks or 110 gallons in individual underground storage tanks, with some exceptions. All tanks for the storage of petroleum at facilities must be registered with the DEC and managed in compliance with applicable regulations for the storage and handling of petroleum.
NY CBS - NY Chemical Bulk Storage (CBS) Database	The Chemical Bulk Storage (CBS) program applies to facilities that store a "hazardous substance" listed in 6 NYCRR Part 597 in an aboveground storage tank larger than 185 gallons, any size underground storage tank, with some exceptions, or in a non-stationary tank used to store 1,000 kg or more for a period of 90 consecutive days or more. All regulated tanks at facilities must be registered with the Department of Environmental Conservation and managed in compliance with applicable regulations for the storage and handling of hazardous substances.
NY SPILLS - New York Spills Information Database	The New York State Department of Environmental Conservation, Spill Prevention & Response Data Section collects data on spills reported to NY DEC as required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since that date.

Caller Remark:	Clean up underway	DEC Remark:	<p>4/26/12-Vought-Duty desk officer. Vought noted no PBS registration for site in PBS database. Called Langan (Chris McMahon Ph:201-794-6900 email:cmcmahon@langan.com) and left message to return call to DEC Vought to provide more info. 5/2/12-Vought-Received message from McMahon and returned call and spoke to McMahon. There was a 550-gallon gasoline UST that was discovered during site redevelopment. Site was an parking garage and will become a permanent Mission of Singapore to the United States. Site building is removed and excavation for foundation taking place. Excavation performed to 16' below sidewalk grade and site visit will be performed on Thursday. Tanks located beneath site access ramp composed of demolition debris. Two additional tanks discovered (assumed to be 550-gallon) and removal activities of tank and site access ramp will begin. Tanks filled with water and no signs of piping or dispenser islands. Development depth will also be 16'bg. Perched groundwater in excavation but did not extend for more than 10' laterally. Foundation construction already began. No city involvement on site. Letter should be sent to: Permanent Mission of Singapore to the United Nations Attn: Suzie Tan 231 East 51st Street New York, NY 10022 Email: suzie_tan@mfa.gov.sg Ph: (212)826-0840x102 Vought called and spoke to Suzie Tan and noted that if contaminated soil present at new foundation depth than the development schduled may be hindered by need for submittal to and review of SSDS plans by DOH. Vought sent via mail and email, and added to E-docs letter including requirements of:1)no development until approval of RAP 2)delineation of soil and groundwater contamination (if applicable) 3)collection of endpoint samples 4)submission of SSDS and/or moisture mitigation efforts 5)submission of PBS registration. 5/7/12-Vought-Onsite meeting cancelled by DEC. No site visit as soil conditions suggesting removal of all contamination. Excavation will proceed and endpoint samples collected today and report will be submitted 6/15/12. 5/15/12-Vought-Received call from and spoke to McMahon and they excavated 28x36x3' deep and have collected eight endpoint samples. Results are non-detect or below Unrestricted SCOS except for one sample which had ethybenzene of 1600ppb and 4610ppb xylene. Additional excavation will performed as well as collection of 3-4 endpoint samples. Graceprepruf moisture barrier will be installed as well as 3' thick concrete slab due to soil conditions. McMahon will submit endpoint samples, site plan and vapor/moisture mitigation techniques via email to Vought for Vought to review and possibly issue no ojections to development email. 6/19/12-Vought-Received email from McMahon on 5/23 that noted As discussed, the Future Mission of Singapore is providing you with the preliminary results of our UST/Spill Closure Investigation. On behalf of the Mission of Singapore, Langan completed the removal of three 550-gallon USTs that were found abandoned and encased in concrete. Additionally, due to the presence of petroleum impacts, the over excavation of approximately 855-tons of petroleum impacted soil and ramp material that was disposed of at off-site at Soil Safe of Logan Township, New Jersey as petroleum impacted non-hazardous material. The number of tons of material disposed of are skewed high due to the removal and off-site disposal of the entire site access ramp as non-hazardous material at the same facility. The petroleum impacted area measured approximately 55-feet by 30-feet, the southern half of which was excavated to a depth of approximately 3.5-feet below current site grade and the northern half was excavated to an approximate depth of 6-feet below current site grade. Based on a conversion factor of 1.5 tons per cubic yard it is estimated that approximately 435-tons of the 855-tons were the result of the impacts associated with the former USTs. No groundwater was observed during over-excavation activities.As shown on the attached figure, Langan following over excavation activities Langan collected 12 post-excavation soil samples (not including appropriate QA/QC field blank and blind duplicate samples) that were sent to Accutest Laboratories for SVOC and VOC analysis in accordance with the CP-51, fuel oil and gasoline combined list. Based on the final results for PE-1 through PE-13 there were no exceedances to the NYSDEC Unrestricted Use Objectives with exception of the sample collected at PE-4, these results are shown on the attached Table. PE-4 was collected as a sidewall sample that was subsequently removed as part as part of the northern portion of the impacted soil removal activities. As identified in our previous conversations, the planned site redevelopment specifies that a waterproofing membrane be installed on all slab and basement walls. As identified in the attached Section 007175</p>

Caller Remark:	caller notified of spill in basment from leak in tank. caller is supervising cleanup.	DEC Remark:	<p>Prior to Sept, 2004 data translation this spill Lead_DEC Field was GOERTZ/TIPPLE/VOUGHT 10/3/01: On this date, K.Goertz inspected the site. Goertz met with the super; Dave Pilchuk, who described what had happenned, what was done, and what was going to be done. The oil which leaked from the tank, spilled onto the concrete fllow, but this floor contained several drains which led to a sump pit which discharges to the sewer. Fortunately, there has been no precipitation over the last few days, so the sump pump did not discharge any oil to the sewer. The sump pump has been deactivated until the cleanup has reched its conclusion. Emteque was hired to supervise the cleanup. John Raguso (212-631-9000) arrived on site immediately after Goertz's inspection. They will continue to vacuum up remaining oil in the sump, and steam clean impacted areas. Mr.Raguso will take pictures at various staged of the cleanup and will forward a report to M. Tipple at the conclusion of the remediation. As of today, there does not seem to be any environmental impact as a result of this spill. (KG) 10/5/01: K.Goertz phoned John Reguso. He said cleanup is complete, and the basement looks better than it did before the spill occurred. He has taken several photos and will be sending a report to Michelle Tibble next week. (KG) 01/21/2002-VOUGHT-Received report from Emteque on 11/9/02. Eastmond & Sons did cleanup via vacuum truck by removing 100 gallons of product from the sump pit and 1000 gallons from the containment room floor and tank room. Room cleaned via degreaser. 11,000 gallon AST rusted beyond repair and was replaced with 7500 gallon AST. PBS application received 1/6/2002. Spill closed 1/21/2002.</p>

Caller Remark:	coned #148394 - 100 gallons in the transformer vault	DEC Remark:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was FOLEY Con Ed e2mis #148394: 05/16/03 17:15 hrs F Fernandez # 54132 of Manhattan #9 reported to N Muldoon #18723 that @ 16:45 hrs at the location 345 E 46 St in Vault 1815 (westerly vault) while responding to a customer complaint he found approx 100 gallons of unknown oil in the vault. The source and cause of the spill are unknown possible bottom leak of transformer. There is no water in the vault. At this time it is not known if there is a release to sewer or waterways due to the fact the drain cannot be seen due to the amount of oil in vault. Two samples were taken one for Oil ID and one for PCB. Spill tag # 33344 was installed. Cleanup pending tanker and crews. 18:35 hrs. operating supervisor i&a reported that bottom completely failure at 18:20 hrs. ERT and DEC on location at this time. 23:30 hrs. v-1815 was partial clean, Remove 355 gal. of oil from vault and 645 gal of water/oil mix from floor. Drain was clogged, Cleanup pending transformer removal. Lab Sequence Number: 03-04117-001 PCB 6 ppm. 6/9/03 cleanup was completed as of 01:45. The Flush truck removed all the liquids. The structure was double-washed with SLIX . The defective transformer was removed for the final cleanup and a new 1,000 kVA transformer was installed during the mid-night shift on 6/9/03.

Caller Remark:	DURING DELIVERY, 100 GAL LEAKED OUT THROUGH VENT ONTO STREET, SIDEWALK AND INTO STORM DRAINS. CLEAN UP PENDING ARRIVAL OF CREW. OIL IS #6 BLOCK HEATING OIL	DEC Remark:	12/08/2006-Vought-Off hours responder. Vought responded to site with DEC Zhune. Spill was #6 fuel oil that came out of vent pipe, ran down sidewalk and entered grate in sidewalk that was used for ventilation for boiler room below. Oil went into boiler room via grate and impacted concrete sump pit. Vought disconnected sump pit and notified NYCDEP of discharge to sewer. Super in building is Marcelo Batista (212-355-1981) and driver name (Hess) is Tony Rebimbaz. Spill amount approximately 40 gallons. NYCDEP Haucon arrived on site and issued violation to Hess for discharge to sewer. As per driver, petrometer read 3667 gallons and UST is 7500-gallons. Driver intended to deliver 3000 gallons (to leave required 10% empty) and spill came out of vent at 2916 gallons. Super and Hess will be installing new petrometer. Hess hired Petroleum Tank Cleaners who responded to the site and vacuumed out sump, applied adsorbent material and powerwashed sidewalk. Spill closed by Vought due to spill on poured concrete floor and no impact to soil or groundwater. 12/11/06-Vought-Received call from John Birabaum (Orsid Realty 212-484-3773) and left message with summary and closed spill status.

Caller Remark:	Driver made a delivery to the wrong address and caused oil to spill onto the sidewalk. Petroleum tank cleaners enroute for clean up. UPDATE - cross reference spill #0810044	DEC Remark:	12/09/08-Zhune spoke to Ray from Hess Oil. He said wrong address delivery by mistake. 20 gallons of #2 oil went to the side walk. PTC are doing the clean up. 12/09/08-Zhune called Joe from PTC (718) 624-4842 said my men just got there. There is oil in the side walk and garage. We have to pump tank out they put wrong oil into the tank. No drain, no soil impacted is all concrete. Call me at in the afternoon by 1;00 to confirm clean up. 12/09/08 I responded to the site being requested by DDO.PTC cleaned the spill on sidewalk by pressure wash.No stain left on the street.I did not observe any spill in the tank room.Tank is AST,8000 gallon.PTC was in process of vac out the #6 oil out of the tank that was delivered by mistake and make the tank usable for storing #2 oil.Case closed.(sr)

Caller Remark:	CLEAN UP IN PROGRESS	DEC Remark:	12/2/13-Vought-Duty desk officer. Vought called FDNY Hazmat #1 (Sanacore Ph:347-203-6886) and no answer to phone. Spill was diesel fuel caused by traffic accident and as such spill on asphalt as well as to sewer. Spill to sewer minimal due to spill amount and most likely flushed by FDNY as to relieve possible explosive condition and spill to concrete most likely cleaned as per FDNY protocol using absorbent materials. Spill closed by Vought.

Caller Remark:	DECK HOSE BROKE ON THE TRUCK ABOUT 20 GALLONS SPILLED TO PAVEMENT AND SOME TO A STORM DRAIN. CLEAN UP IS PENDING SPILL IS CONTAINED.	DEC Remark:	06/30/09-Hiralkumar Patel. spoke with Roger at Appollo petroleum. #6 oil leaked from broken hose onto concrete pavement and ran into coned manhole. waiting for cleanup company. fill box is on E 45th street. another spill reported (spill #: 0903722) by coned. 06/30/09-HRAHMED-Responded to the site as Day-time runner. Met Roger Romance, Safety Manager for Metro Fuel Oil Corp(500 Kingsland Ave, Brooklyn, NY 11222, Tel: 718 383 1400, Cell: 347 539 1477). NYPD, FDNY, ConED, DEP Hazmat was on scene. As per Roger Spill happened due to hose burst of one of Metro delivery truck, which had a scheduled delivery of #6 fuel oil to 320 E 46 ST building. Spilled oil on street. Crew from 301 E 45 ST was doing a sidewalk wash at that time. Spilled oil mixed with water ran along the curb and impacted 3 DEP manhole and 1 ConED manhole. ConEd will cleanup coned manhole and Metro crew will cleanup the rest. As per Roger the cleanup should be completed by evening. Roger will forwarda closure report describing the cause of the spill, cleanup activities and disposal manifest. 7/23/09 - Austin - Portion of spill that impacted 3 service boxes was cleaned up by Con Ed - Spill # 0903722 closed. See EMIS in eDocs for that spill. - end 7/28/09-Metro Fuel Oil confirmed the cleanup and sent disposal manifest. This case is closed.

<p>Caller Remark:</p> <p>Delivery was made, but none of the oil made it to the tank. Location of the delivered oil is unknown.</p>		<p>DEC Remark:</p>	<p>glenwood mgmt corp. 718-343-6400 howard heisner. PTC en route to investigate. 7/22/13 - Austin - Spill assigned to DEC Piper - PTC reported thsat there was no visible evidence of the missing oil (odors, seepages, stains, etc.) - PTC will put together a plan to do tank line tests, borings, et. al. to ascertain the whereabouts of this 2K+ of # 2 foul, and submit it to Piper - end 9/6/13- work to begin in Oct. as per Charlie. DEC Piper received update. Two trenches were dug around fill line to locate missing oil. Residual soil contamination was encountered and removed. The trenches were located in the sidewalk and were approx. 50 sq ft. and 11-12 feet deep. Approx 42 tons of soil was removed. Work to date was insufficient to close spill as oil is still missing. MW warranted. 5/5/2016- DEC Piper left message for Howard to call back with info/ update. 8/16- DEC piper received notice that MW will be installed in sidewalk and in parking garage where oil is observed seeping through wall. bldg. rep Edward Knowles- 646-208-6252 Charles powers- 516-448-5004 March 23, 2017 - V. Brevdo As per request from the Chief of the Spill Prevention and Response Section, this project is transferred to Petroleum Remediation Section B and assigned to Vadim Brevdo as project manager. As per previous project manager, Rayan Piper, this is a site that is a candidate for transfer to remediation. A 2,100 gallon delivery was made to the tank system on 6/12/13. Due to improper valving, the delivery never made it to the tank. Petroleum Tank Cleaners was originally on the job though was taken over by Charles Powers at CNS Management Corp. In 2013, trenches were dug in sidewalk to approx. 11 feet below grade though only residual soil was encountered. Approximately 42 tons of soil was removed though was insufficient. This past summer/fall, CNS installed several wells in the parking garage and sidewalk in which free phase product was discovered adjacent to the stretch of buried fill line. CNS has performed multiple VEFR events on the wells though product is still recharging back into the wells. The oil has only recently been found. Charles Powers at CNS Management Corp is a contact person for this project. VB March 23, 2017 - V. Brevdo I (V.B.) left phone message to Mr. Charles Powers at CNS Management Corp. advising him that project has been transferred to a long term petroleum remediation program at DEC Region 2 office and left my contact number, asked him to give me a call to discuss the project and left my number, also stated that all submissions should be directed to me from now on. I stated that this transfer will not affect negatively the pace of the project implementation and that we will go from here to ensure a further progress at this spill site towards implementation and completion of remedy and ultimately closure of the spill case. VB November 13, 2017 - V. Brevdo Communicated via telephone with Mr. Charles Powers of CNS and Mr. Powers advised me that a remedial system was installed as well as downgradient well which supposedly does not indicate any of contaminants migration off-site. I have requested Mr. Powers to send the documentation related to project progression from 2014 to today. Mr. Powers expressed commitment to send the requested documentation by either end of this week or early next week. I also stated that I want to establish a permanent line of communication on this project so that DEC receives all project related information in a timely manner. Mr. Powers expressed commitment to this request as well. Awaiting receipt of project related updates by end of this week or early next week. VB November 20, 2017 - V. Brevdo In late afternoon called Charles Powers of CNS and asked why updated documents have not been provided as he committed on November 13, 2017. Mr. Powers explained that he started assembling documents but got distracted by other business matters. Mr. Powers reiterated his commitment to provide updated documents and said he will do so by end of today or tomorrow, November 21, 2017. I ask Mr. Powers to provide documents within two days. VB November 21, 2017 - V. Brevdo Called Mr. Edward Knowles (646-208-6252), VP for field operations for East 46 Street Realty LLC, and left message explaining I need up to date project related documents, that I contacted Mr. Powers of CNS but fruitless so far even though Mr. Powers stated he would provide documents (see above). I left my name, phone # and stated I am NYSDEC project manager for the open spill case for 320 E46th Street Property. VB November 24, 2017 - V. Brevdo Mailed hard copies of the letter dated 11/24/17 formally requesting that East 46th Street Realty, LLC and CNS Management Corp. submit updated project-related correspondence and documents describing in detail the status of the project and investigative/remedial efforts that have been undertaken to date, including sampling/analytical data and conclusions and recommendations for further course of action, in order to complete environmental investigation and cleanup and, ultimately, accomplish closure of the spill case associated with the property. Requested that the project-related information be submitted no later than December 8, 2017, and if no correspondence and documentation received by December 8, 2017 the case may be referred to the Department</p>

Caller Remark:	cleanup in progress	DEC Remark:	<p>PBS : 2-207802 2/24/15: Mahat DEC Mahat contacted Chris Quintana inquiring about the spill and its nature. After the delivery, when driver was making the delivery they had an accident with the delivery truck. Back pressure from blowing the fuel line causes the positive pressure on the truck causing some fuel oil spill on the site. All boro has performed the clean up on the site and provided the pictures to the Department. A complete clean up will be provided to the Department once the clean up will be performed. Con Ed manhole was impacted and DEC Mahat notified ERT. Road spill has been cleaned by the All Boro. DEC is waiting for a closure report.</p> <p>2/24/15: Mahat Tosh, From what we understand from the (Super) David, on site, the spill came from the oil delivery truck. A fitting on the top of the tank let loose spewing oil into the surrounding area. This incident had nothing to do with the oil tank. If you require additional information, we will try and get you the super's number. Regards, Francine All Boro Tank 656 Atkins Avenue Brooklyn, NY 11208 (718) 975-3963 (718) 285-8680 (347) 295-0573 Fax 4/29/15: Mahat DEC Mahat received a spill closure report, based on the report, the Department doesn't warrant any further investigation. Spill case is closed in Spill Database.</p>

Caller Remark:	Data Not Reported	DEC Remark:	<p>07/26/13-Hiralkumar Patel. 2:32 PM:- spoke with Rob. he mentioned that as part of conversion from #6 to #2 oil, they cleaned tank and went for tightness test earlier this week. site has one 8,000 gal AST completely wrapped in concrete. while exposing manhole, crew noted some holes on tank top and decided not to test system. Rob confirmed no evidence of oil release around tank. Riteway is working for Controlled Combustion. property owner will remove vault around the tank and Riteway will return for necessary repair/cleanup. alternate address: 305-311 East 46th Street no other spills found. PBS #: 2-032387. as per PBS record, the site has one 8,000 gal #4 oil AST in contact with impervious barrier. the tank was installed in Dec. 1928. 2:58 PM:- spoke with Mr. Zeppa, property manager. he mentioned that URS is overseeing this project. he mentioned that concrete wrap around the tank has been removed and URS has inspected floor. he got report from URS and will send it for review. informed him that PBS record must be updated immediately with correct contact information. GPT Properties Trust **property owner** c/o Reit Management & Research LLC. 111 River Street Hoboken, NJ 07030 Attn.: James Zeppa **property manager** Ph. (201) 798-0404 (O) (617) 717-8833 (C) email: jzeppa@reitmr.com 3:04 PM:- sent email to Mr. Zeppa including PBS application. 4:25 PM:- received email from Mr. Zeppa. he mentioned that Rob Hurley of URS assessed the tank's condition, the floor beneath the tank and did not identify an environmental concerns related to the tank. bottom of the tank was observed to be intact with no pitting or holes. 07/29/13-Hiralkumar Patel. 9:45 AM:- visited site. met Gaston Paux, building engineer. site has one 8,000 gal #6 oil aboveground tank sitting on floor. bottom of tank floor is not visible. also, the tank is touching the building's foundation wall on side. currently, only front portion of half of the tank is visible. tank is located under the sidewalk. Mr. Paux mentioned that they had water seepage into tank vault area before replacing the sidewalk. the tank was wrapped in cinder blocks. saw signs of corrosion in upper part of the tank. no sign of spill noted in visible portion of the tank room. no petroleum odors noted in area. Mr. Paux mentioned that the 17 story building has at least 1.5 ft thick floor. asked Mr. Paux to secure the fill port to prevent deliveries to leaking tank. Gaston Paux **building engineer** Ph. (917) 335-1674 based on tank's location, it is unclear how Rob Hurley inspected tank's bottom and confirmed no release. 12:35 PM:- spoke with Mr. Zeppa. based on observations during the site visit, asked Mr. Zeppa to secure the fill port. he confirmed that Mr. Paux has sealed the fill port with cement. informed Mr. Zeppa that if the existing tank is replaced, site inspection needed once the tank removed. but if they reuse the tank, then subsurface investigation may be needed as all areas around the tank are not accessible for inspection. Mr. Zeppa mentioned about installation of smaller tank with dual-phase burner. 08/07/13-Hiralkumar Patel. 1:23 PM:- left message for Mr. Zeppa. 08/12/13-Hiralkumar Patel. 12:01 PM:- spoke with Paige Charlton at management office. she mentioned that management has decided to install a new tank at the site. asked her to inform, once existing tank is removed. she will send email with update. Paige Charlton Tenant Coordinator Real Estate Services Reit Management & Research LLC 111 River Street Hoboken, New Jersey 07030 Ph. (201) 798-0404 Fax (201) 610-0592 email: pcharlton@reitmr.com 08/16/13-Hiralkumar Patel. received letter from URS. found leak in tank itself during isolation test. no leak found in fill or return lines. URS inspected tank and found several quarter-sized holes in area of the round, bolted-on access plate on top of the tank. also found stain under the center of the tank on the west side. no odor or oil film noted within a drain located in tank room. URS mentioned that the existing tank will be removed and replaced by 4,000 (or 5,000) gal tank. URS will inspect tank room, once tank is removed. URS also submitted PBS notification for tank removal. forwarded PBS notification to DEC Nick. 10/10/13-Hiralkumar Patel. 12:09 PM:- received email from Ms. Charlton stating that tank has been removed. 1:45 PM:- visited site. met Mr. Paux. inspected tank room. found tank room floor and walls in good condition. no signs of spill noted in area. based on observations, case closed. 10/15/13-Hiralkumar Patel. received message from Mr. Zeppa. 9:07 AM:- spoke with Ms. Charlton and informed her that the case is closed. 10/29/13-Hiralkumar Patel. received closure report from URS.</p>
